

Album: [Since Time Immoral](#) – Artist: The Kipper Family

Well one morning last autumn I was walking my dogs
When the Duke of Wellington we did meet.

Well Bonzo and Rover, they slobbered him all over,
While Dido nearly knocked him off his feet.

Well there was....

Dido, Fido, Bonzo and Rex

Rover and Lassie and Spot

There was Butch, there was Candy

There was Patch and there was Sandy

These were the dogs what I had got.

Well don't worry sir I said,

He won't hurt you that's just

His way of saying he like you a lot.

But he took my little dog, and he kicked him in the
bog

And said that's my way of showing I do not.

There was.....

Now the next dog being old, he was a trifle deaf

He couldn't hear a single word I said.

And so when I told him sit, he made an awful mess.

When I cleaned it up I shot the bugger dead.

That still left....

Now the next dog being daft, and not all the ticket

He made straight away for the river.

And there he did jump in, but the bugger couldn't swim

That's the last we saw of him forever.

There was.....

They chased a rabbit o'er the plain,

but that chased 'em back again

Which put my poor old dogs in quite a stew.

Now it's just 12 months today

Since I heard the squire say

" I should have them all put down, if I was you."
There was.....

And so on for the rest of the song. I've put the chord changes in where I change.
Alternative keys could be D (with G and A), C (with F and G or G7) or use your capo.
Enjoy!
